

hybrid systems

Contract Research

Hybrid Systems offers a range of laboratory services on a flexible short to medium term contract basis. The service is specifically aimed at those requiring defined laboratory studies to be performed without the expense of hiring their own full time staff.

Scope of services offered:

- Production of viral vectors for research use including adenovirus, vaccinia and influenza.
- Evaluation or beta testing of diagnostic assays.
- Full range of tissue culture services including growth stimulation and toxicity assays.
- Quantitative PCR, Flow cytometry and reporter gene assays.

About Hybrid Systems Ltd.

Hybrid Systems is an established Oxfordshire Biotech company specialising in biological therapeutics and contract research since 2001.
